

West Lake Landfill – Public Comment Period

The U.S. Environmental Protection Agency (EPA) Region 7 has published the **Proposed Plan** and initiated a public comment period for the West Lake Landfill Superfund Site, located in Bridgeton, Missouri.

The public comment period will run from Feb. 6, 2018, through March 22, 2018.

A **Public Meeting** to inform residents of the Proposed Plan, and obtain comments on the Proposed Plan and EPA's preferred remedy, will be held:

Tuesday, March 6, 2018
6 p.m. to 9 p.m.
District 9 Machinists Hall
12365 St. Charles Rock Road
Bridgeton, Missouri

Written comments will be accepted throughout the comment period, and oral comments may be submitted at the EPA Public Meeting.

EPA encourages residents to register in advance to submit comments at the Public Meeting. Registration will be held on a first-come, first-serve basis. Residents may register by contacting Ben Washburn, community involvement coordinator, at 913-551-7364 or washburn.ben@epa.gov.

Written comments on the Proposed Plan may be submitted as follows:

- **Online:** See comment form below or send email to: R7_WestLakeLandfillPublicComments@epa.gov
- **Postal Mail:** Ben Washburn, Office of Public Affairs, U.S. EPA Region 7, 11201 Renner Blvd., Lenexa, KS 66219. Mailed comments must be postmarked by March 22, 2018.

You can review the Proposed Plan, supporting documents, and Administrative Record on the [EPA West Lake Landfill page](#).

Information Repository:

St. Louis County Public Library
Bridgeton Trails Branch
3455 McKelvey Road
Bridgeton, Missouri

Use the form below to send EPA your comments on the Proposed Plan. (NOTE: Form letters and petitions should be submitted via email to: R7_WestLakeLandfillPublicComments@epa.gov.)

Comment (Required)

The EPA is kicking it up a notch in the approach for getting things going on the West Lake Landfill. Thank you for the hard work put into the plan. How will the material be disposed once it is excavated? I'd like to see the EPA use onsite disposal instead of relocating it across the state and endangering people. Onsite disposal is safest.
